Table 71. Has enough things to do when at home ('yes' responses only)	116

Relationships 117

Table 72. Has friends who are not staff or family members ('yes, has friends who are not staff or family' responses only)	119
Table 73. Has best friend (may be staff or family); ('yes' responses only) ^a	121
Table 74. Wants help to meet or keep in contact with friends ('yes' and 'maybe' responses)	123
Table 75. Has friends (may be staff or family) and can see them when wants to ('yes' responses only)	125
Table 76. Reasons cannot see friends (if sometimes or often unable to see friends) ^a ∞.....	127
Table 77. Has other ways of talking, chatting or communicating with friends when cannot see them ('yes' responses only).....	129
Table 78. Can see and communicate with their family when they want (among those who <i>do not</i> live in the family home; 'yes, sees family whenever wants, or chooses not to see family' responses only) ^a	131
Table 79. Often feels lonely ('yes, often' responses only) ^v	133
Table 80. Can go on a date or is married or living with partner ('yes, can date or is married or living with partner' responses only)	135

Satisfaction 136

Table 81. Likes home or where lives ('yes' responses only)	138
Table 82. Wants to live somewhere else ('yes' responses only) ^v	140
Table 83. Has a paid job in the community and likes job ('yes' responses only)	142
Table 84. Has a paid job in the community and wants to work somewhere else ('yes' responses only).....	144
Table 85. Attends a day program or workshop and wants to go more, less, or the same amount of time ^a	146
Table 86. Services and Supports help person live a good life ('yes' responses only).....	148

Service Coordination 149

Table 87. Met case manager/service coordinator ('yes' responses only)	151
Table 88. Case manager/service coordinator asks person what s/he wants ('yes' responses only).....	153
Table 89. Able to contact case manager/service coordinator when wants ('yes' responses only)	155

Table 90. Took part in last service planning meeting, or had the opportunity but chose not to ('yes' and 'had opportunity, but chose not to' responses).....	157
Table 91. Understood what was talked about at last service planning meeting (if attended last planning meeting; 'yes' responses only)	159
Table 92. Last service planning meeting included people that the person wanted to be there (if attended last planning meeting; 'yes' responses only).....	161
Table 93. Person was able to choose services they get as part of service plan ('yes' responses only)	163
Table 94. Staff come and leave when they are supposed to ('yes' responses only)	165
Access.....	166
Table 95. Has a way to get places needs to go ('yes, almost always' responses only)	168
Table 96. Able to get places when wants to do something outside of home ('yes, almost always' responses only).....	170
Table 97. Staff have right training to meet person's needs (proxy respondents who <i>were not staff</i> were allowed for this question; 'yes' responses only) ^o	172
Table 98. Additional services needed (proxy respondents were allowed for this question) ^o	174
Table 99. Additional services needed (continued; proxy respondents were allowed for this question) ^o	175
Table 100. Additional services needed (continued; proxy respondents were allowed for this question) ^o	176
Health	177
Table 101. Has a primary care doctor or practitioner (information may have been obtained through state records; 'yes' responses only)	179
Table 102. In poor health (proxy respondents were allowed for this question; 'poor health' responses only) ^o	181
Table 103. Had a complete physical exam in the past year ('in the past year' responses only; information may have been obtained through state records).....	183
Table 104. Had a dental exam in the past year ('within the past six months' and 'within the past year' responses; information may have been obtained through state records).....	185
Table 105. Had an eye exam in the past year ('within the past year' responses only; information may have been obtained through state records).....	187
Table 106. Had a hearing test in the past five years ('within the past five years' responses only; information may have been obtained through state records).....	189
Table 107. Had a Pap test in the past three years (among women 21 and older; 'within the past year', 'within the past two years' and 'within the past three years' responses; information may have been obtained through state records) ^o	191
Table 108. Had a mammogram test in the past two years (among women age 40 and over; 'past year' and 'past two years' responses; information may have been obtained through state records)	193
Table 109. Last colorectal cancer screening (among people age 50 and over; information may have been obtained through state records) ^o ^o	195
Table 110. Had a flu vaccine in the past year ('yes' responses only; information may have been obtained through state records).....	197
Medications.....	198
Table 111. Takes at least one medication for mood, anxiety, psychotic disorder and/or behavioral challenge (information may have been obtained through state records).....	200
Table 112. Takes medication for mood, anxiety, and/or psychotic disorders (information may have been obtained through state records).....	202
Table 113. Number of medications taken for at least one of the following: mood disorders, anxiety, or psychotic disorders (information may have been obtained through state records).....	204
Table 114. Takes medication for behavior challenges (information may have been obtained through state records)	206
Table 115. Number of medications taken for behavior challenges (information may have been obtained through state records).....	208
Table 116. Has a behavior plan (information may have been obtained through state records)	210
Table 117. Has a behavior plan (among those who take medication for a behavior challenge; information may have been obtained through state records).....	212

Wellness	213
Table 118. Exercises or does physical activity at least 3 times per week ('yes, sometimes [1-2 times a week]' and 'yes, regularly [at least 3 times a week]' responses; proxy respondents were allowed for this question)	215
Table 119. Body Mass Index (BMI) category (BMI calculated using data on weight and height; information may have been obtained through state records).....	217
Table 120. Uses nicotine or tobacco products ('yes' responses only; information may have been obtained through state records) ^	219
Respect and Rights	220
Table 121. Has a key to the home ('yes' responses only; proxy respondents were allowed for this question) ^222	
Table 122. People (who do not live in the home) let person know before entering home ('yes' responses only)224	
Table 123. Can lock bedroom ('yes' responses only; proxy respondents were allowed for this question)	226
Table 124. People let person know before entering person's bedroom ('yes' responses only).....	228
Table 125. Others read mail without asking ('yes, mail/email is read without permission' responses only) ^ ..	230
Table 126. Can use phone and internet when wants ('yes, can use anytime, either independently or with assistance' responses only)	232
Table 127. Can be alone with friends or visitors at home ('yes, can be alone with friends or visitors' responses only)	234
Table 128. There are rules about having friends or visitors at home ('there are rules against having friends or visitors in your home' responses only) ^ ^	236
Table 129. Has a place to be alone in the home ('yes' responses only)	238
Table 130. Staff treat person with respect ('yes – all staff, always' responses only)	240
Table 131. Has attended a self-advocacy group, meeting, conference or event or had the opportunity and chose not to ('yes' and 'had the opportunity but chose not to participate' responses; proxy respondents were allowed for this question).....	242
Table 132. Has voted in local, state, or federal election, or had the opportunity and chose not to ('yes' and 'had the opportunity to register or vote but chose not to' responses; proxy respondents were allowed for this question)244	
Safety	245
Table 133. There is at least one place where the person feels afraid or scared (in home, day program, work, walking in the community, in transport, or other place) ^	247
Table 134. Have someone to go to for help if they ever feel scared ('yes' responses only)	249

Adult Consumer Survey Highlights

LOOKING AT THE 2016-17 ADULT CONSUMER SURVEY (ACS)

Respondents: Adults (aged 18 and over) with an intellectual/developmental disability receiving one service (in addition to case management) from the state DD agency.

39 states (including the District of Columbia)*: Total sample: 21,625

Demographics and personal characteristics of the sample

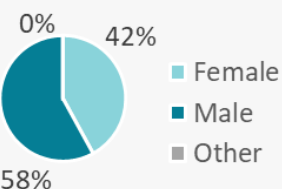

Average Age

42 years old

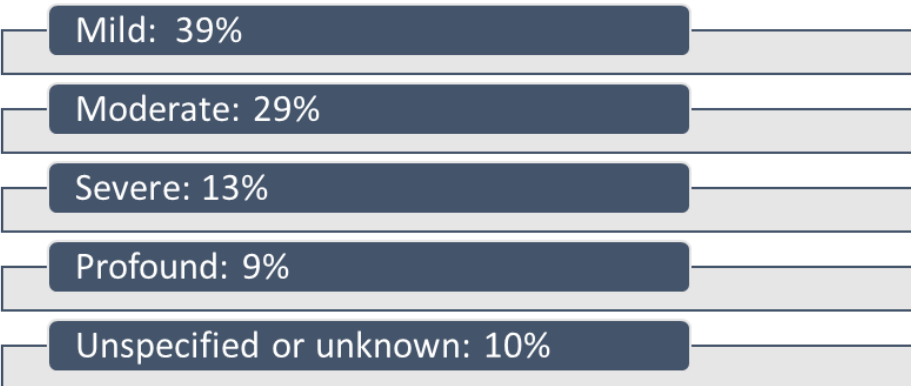

Race/Ethnicity:

- 72% -- White
- 16% -- Black/African American
- 6% -- Hispanic
- 5% -- Other**
- 1% -- Don't know

Gender

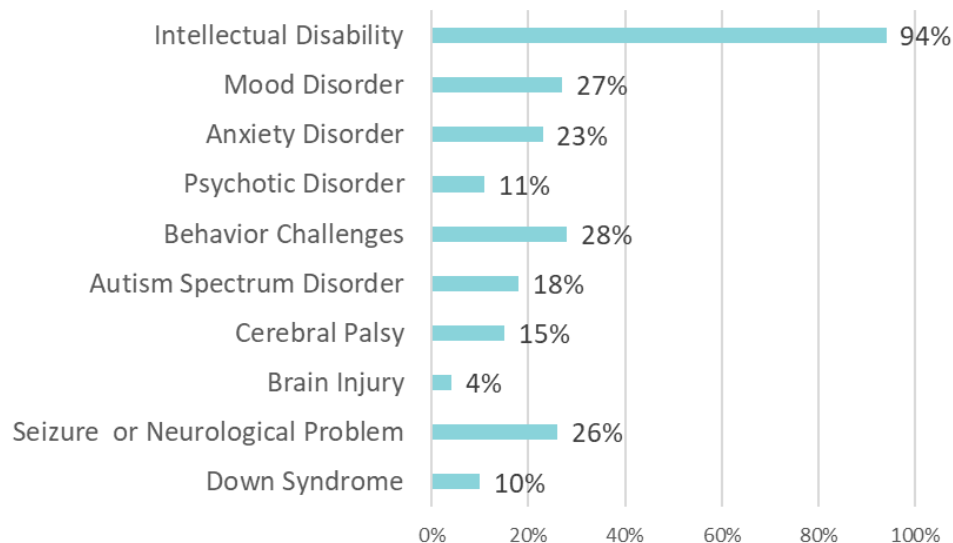

Level of ID (of those with an ID diagnosis)

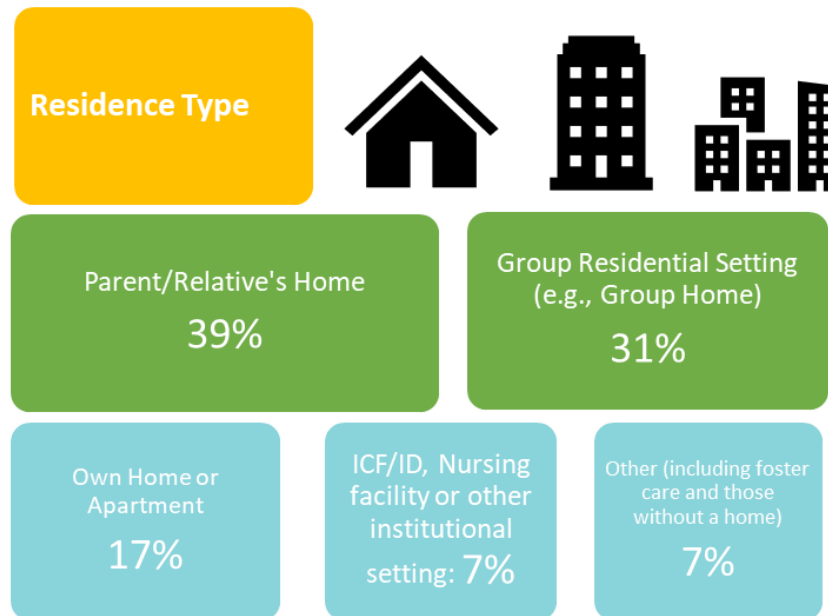

Diagnoses of adults with disabilities

Not mutually exclusive; 'Don't know' responses included in denominator

Residence Type

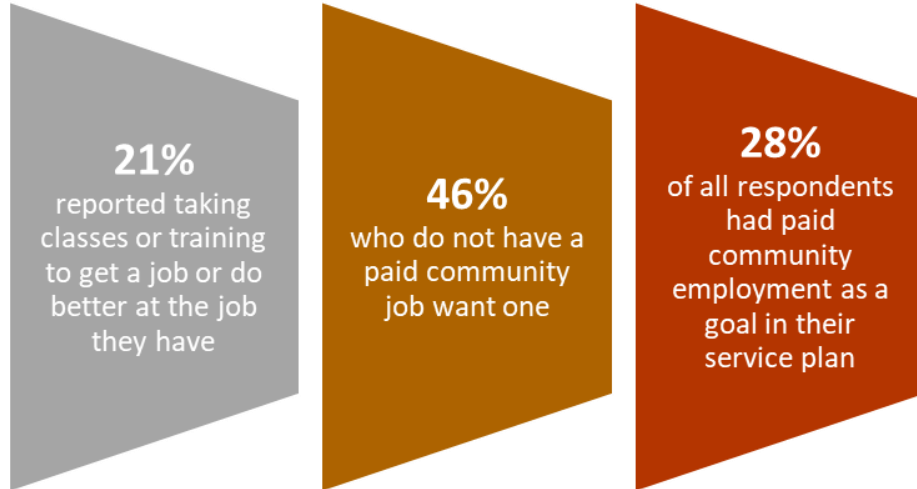

*ACS: AL, AR, CO, CT, DC, DE, FL, GA, HI, ID, IL, IN, KS, KY, LA, ME, MI, MN, MO, MS, NC, NE, NH, NJ, NV, NY, OH, OK, OR, PA, RI, SD, TN, TX, UT, VA, VT, WI, WY.
Demonstrates weighted NCI Average data

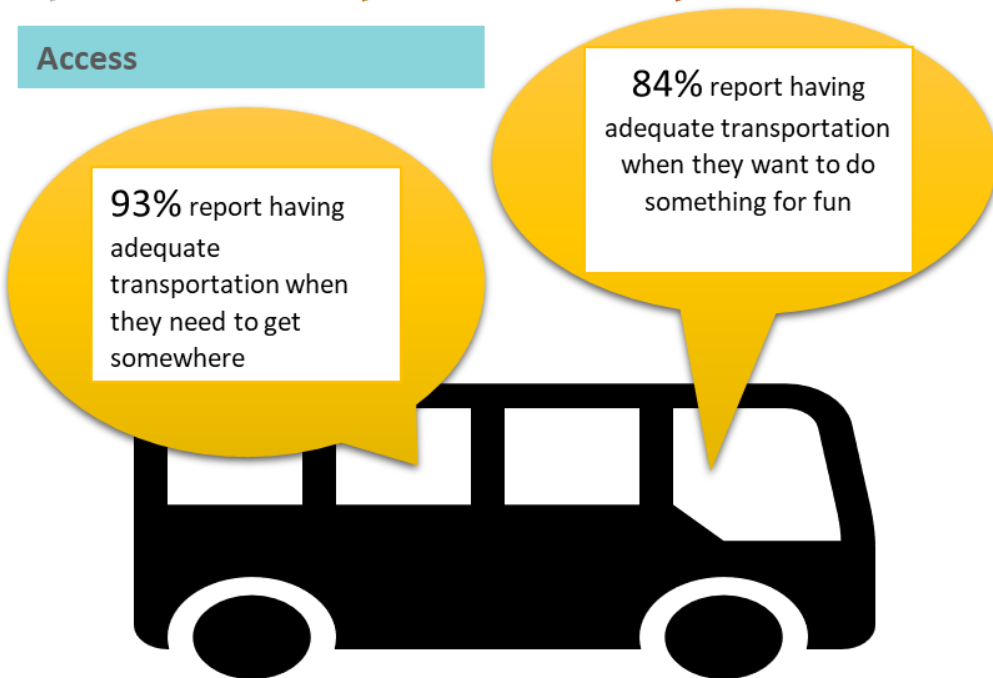

**Includes American Indian, Asian, Pacific Islander, two or more and other

Employment

19% of respondents were reported to have a **paid community job (Individual and/or group)**

Access

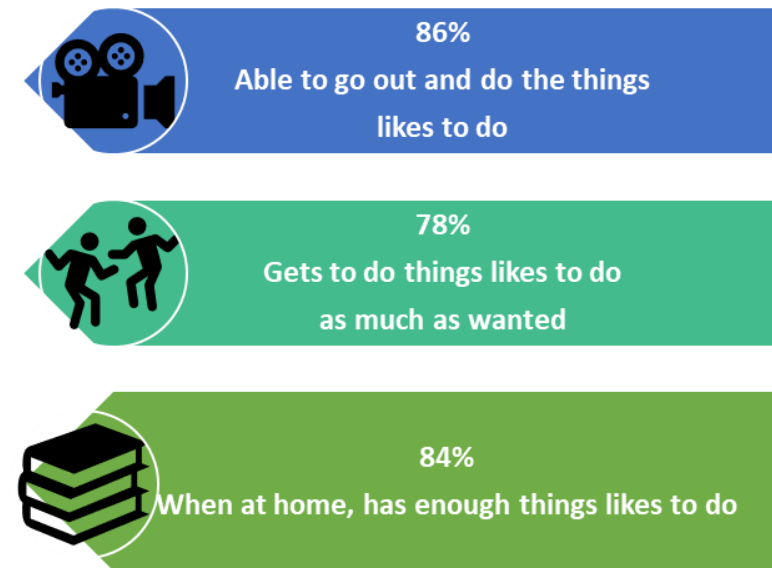

Choice, Decision-making and control

Adjusted variables

Community Inclusion, Participation and Leisure:

Health:
Of respondents.....

98%

- Were reported to have a primary care doctor

81%

- Were reported to have had a dentist visit in the past year

3%

- Reported being in poor health

Relationships:

Percentage of respondents who report that they...

Have friends who are not staff/family
77%

Can see friends when wanted
79%

Want more help to make or keep in contact with friends--41%

Often feel lonely--11%

They like their home-- 90%

They like where they work in a paid community job --90%

Services are helping them to live a good life -- 90%

Satisfaction:
Percentage of respondents who report that...

Rights and Respect:
Percentage of respondents who...

13%
Report that their mail is read without permission

92%
Report that staff treat them with respect

91%
Report being able to use the phone or internet whenever wanted

96%
Report having a place to be alone at home

I. Results

This section briefly describes the structure of the survey instrument and presents the results of the most recent data collection cycle.

Survey Administration

Thirty-eight states and the District of Columbia administered the Adult Consumer Survey in 2016-17 and submitted valid samples for analysis: Alabama (AL), Arkansas (AR), Colorado (CO), Connecticut (CT), Delaware (DE), District of Columbia (DC), Florida (FL), Georgia (GA), Hawaii (HI), Idaho (ID), Illinois (IL), Indiana (IN), Kansas (KS), Kentucky (KY), Louisiana (LA), Maine (ME), Michigan (MI), Minnesota (MN), Mississippi (MS), Missouri (MO), Nebraska (NE), Nevada (NV), New Hampshire (NH), New Jersey (NJ), New York (NY), North Carolina (NC), Ohio (OH), Oklahoma (OK), Oregon (OR), Pennsylvania (PA), Rhode Island (RI), South Dakota (SD), Tennessee (TN), Texas (TX), Utah (UT), Vermont (VT), Virginia (VA), Wisconsin (WI), and Wyoming (WY).

Together, they collected survey responses and information from a total of 21,625 individuals.

Survey Development

The Adult Consumer Survey was initially developed by a technical advisory subcommittee for the purpose of collecting information directly from individuals with intellectual/developmental disabilities and their families or advocates. Many questions were drawn from survey instruments in use in the field; others were developed specifically for NCI. NCI staff routinely test and refine the instrument based on feedback from surveyors.

Most participating states use the basic survey tool developed by the project. However, some states opt to incorporate additional survey questions to look more deeply at specific issues. The addition of supplementary questions is typically done after a state participates in NCI for at least a year and establishes baseline results.

Organization of the Survey

The Adult Consumer Survey consists of a pre-survey form, three distinct survey sections, and a surveyor feedback form. Each is described below.

Pre-Survey Information: This form has questions that help the surveyor prepare for the meeting as well as assist the surveyor in administering the survey questions. Pre-Survey information is not included in the analysis by HSRI and thus not included in this report; it is for interviewer use only.

Background Information: This section consists of questions about demographics, residence, health, employment status, and services and supports. Data is generally collected from state records, case managers, or a combination of both.

Section I: This section attempts to determine the individual's level of satisfaction and opinions. It may *only* be completed through a direct meeting with the individual.

Section II: This section contains questions that are answered by a direct meeting with the individual when possible. If the person is unable to respond, a proxy who knows the person well may be used. Case managers or service coordinators are not allowed to respond to these questions on the individual's behalf.

Surveyor Feedback Sheet: This form is used to record information such as the length of the NCI meeting with the individual and any problematic questions encountered.

Presentation of Demographics

The following section details the demographic profile of respondents to the 2016-17 Adult Consumer Survey. Tables display demographic results listed alphabetically by state.

States receive an 'n/a' designation in table presentations for a survey item if fewer than 20 people responded; however, their data are included in the NCI Average.

IMPORTANT NOTE ON CHANGES TO REPORTING: In previous years, the NCI average was calculated as the simple arithmetic mean of all state means (an approach known as “average of averages”). This year, the approach has been enhanced to take into account the relative numbers of people receiving services through participating states’ systems. **Beginning this year, the NCI averages contained in this report are “weighted” means; their calculations reflect the relative population sizes of participating states, as well as the sample sizes.** See more about weighting in the Methodology section. In addition, the TX sample has been weighted for disproportionate sampling of their populations receiving services from Managed Care Organizations, and those not receiving services from Managed Care Organizations. See more about weighting in the Methodology section.

Please note that MN’s sample is not weighted.

Demographic Characteristics of Respondents

This section presents descriptive information on the respondents surveyed.

Important Note on Missing Data:

For several states, survey items in the Background Information section (including certain items related to Demographics, Health, Medication, and Wellness) had a large amount of missing data or data recorded as “don’t know.” Where 25% or more of a state’s sample had “don’t know” or missing responses, we used an asterisk (*) to indicate that state’s data should be interpreted with caution.

The quantity of missing data can be a result of several factors. We do not know whether the data are missing systematically or randomly; for example, are data missing across the board for those in a specific waiver population in a given state? If so, the resulting data are not representative of the entire sample or population. We advise caution when examining data that are indicated as having high rates of “missing” or “don’t know” responses. Please note that the NCI average reflects the average of data that were reported to HSRI and may not be reflective of the service population across the country.

*State had a large number of "don't knows" and missing data (at least 25%)

Core Indicator Outcomes and Comparisons Across States

The following section provides outcome data for the Adult Consumer Survey. Outcome results are presented in subsections that correspond with the Adult Consumer Survey domains. Charts illustrate un-collapsed averages for all unadjusted indicators.¹ Corresponding tables show collapsed data broken out by state and include the weighted NCI Average as well as the number of respondents by state and in total.

Tables are formatted so that all states are listed in descending order of percentage and are categorized as statistically significantly above the NCI Average, within the range of the NCI Average, and significantly below the NCI Average. Risk-adjusted indicators are noted in text with the table. Notably, significance testing was not performed for risk-adjusted indicators and state results are simply presented in descending order.

The tables also break out average results for each state by the type of residence: ICF/IID or other institutional settings, group residence, own home, parent/relative's home, foster or host home. Significance testing was not performed on the breakouts by residence, and the number of people in each residential setting is often too small to allow for valid state-to-state comparisons. For the same reason, in many cases statistically valid conclusions cannot be drawn about differences between residence types. This information is provided for states' internal purposes and should not be used to compare one state with another. If a state had fewer than 20 people in a residence type with valid responses to a given indicator, the outcome breakout by that residence type for that particular indicator is not reported. Figure A below presents, by state, the number of people surveyed in each residence type.

For all outcomes, states receive an 'n/a' designation in table presentations for a survey item if fewer than 20 people responded; however, their data are included in the NCI Average.

Note on Significance: Statistical significance depends on both the amount by which a state differs from the average for a given item and the state's sample size for that item. So, you may see instances where State A's difference from the average is larger than State B's, but State B is shown as significantly different from the average whereas State A is not. The larger the sample size of a state, the smaller the difference needs to be for it to be statistically significant.

¹ See Appendix B for more information on how data are collapsed and Appendix D for un-collapsed and unadjusted data by state

IMPORTANT NOTE ON CHANGES TO REPORTING: In previous years, the NCI average was calculated as the simple arithmetic mean of all state means (an approach known as “average of averages”). This year, the approach has been enhanced to take into account the relative numbers of people receiving services through participating states’ systems. **Beginning this year, the NCI averages contained in this report are “weighted” means; their calculations reflect the relative population sizes of participating states, as well as the sample sizes.** See more about weighting in the Methodology section.

Please note that MN’s sample is not weighted.

Figure A. Number of people in each type of residence²

The "Overall in State" column represents the results for all cases in each state. This includes all cases that responded to this question. In the "Choice and Decision Making" domain, the percentages in this column are risk adjusted.

("yes responses only") indicates the response that the percentages reflect. For example, 95% of people who answered this question from KY said "yes"

For states in this section, statistical testing has indicated that their averages are statistically significantly within the NCI average range

For states in this section, statistical testing has indicated that their averages are statistically significantly above the NCI average

The "N" column represents the total number of cases with valid responses to this question. States' Ns vary by question because not all respondents answer every question

These are the "residence type breakouts." The numbers in each column represent the percentage of people (who responded to this question) in the indicated residence type, who (using this example) reported having enough things to do while at home. For example, looking at KY in this example, of the respondents who answered this question and live in a group residence, 90% reported having enough things to do at home.

For more information on what type of residence is included in each breakout group, see the section of this report called "Core Indicator Outcomes and Comparisons Across States"

This is the NCI Average. It represents the weighted average across all participating states. For more information on weighting, please see the section of this report called "Core Indicator Outcomes and Comparisons Across States"

For states in this section, statistical testing has indicated that their averages are statistically significantly below the NCI average

Choice and Decision-Making

People make choices about their lives and are actively engaged in planning their services and supports.

The Adult Consumer Survey includes nine choice items that correspond to the Choice indicator; all but one item, “Chose Case Manager” (Table 39), were risk-adjusted. Outcome adjustment or “risk adjustment” is a statistical process used to control for differences in the individual characteristics of people who completed the NCI Survey across states. For a more robust description of risk adjustment see the Data Analysis section of Part II of the 2016-17 ACS National Report.

Two Choice composite scale scores were produced by adding and averaging Choice items. The Life Decisions scale (Table 37) refers to choice of: residence, work, day activity, staff, and roommates. The Everyday Choices scale (Table 38) refers to choice of: daily schedule, how to spend money, and free time activities. Both scales were risk-adjusted. For more information on development of scales see the Data Analysis section of Part II of the 2016-17 ACS National Report.

Table 29. Chose or had some input in choosing where they live *if not living in the family home* ('person made the choice' and 'person had some input' responses; adjusted variable; proxy respondents were allowed for this question)^

^oQuestion changed from previous years

Work

People have support to find and maintain community integrated employment.

NCI reports on three types of community jobs:

1. Individual job without publicly funded supports—an individual job in which the person does not receive state or other funded supports;
2. Individual job with publicly funded supports—an individual job in which the person receives state or other funded supports; and
3. Group-supported—a job that takes part in an integrated setting but is done with a group of individuals with disabilities (e.g., work crew). Group-supported jobs may or may not receive publicly funded supports.

For several states, survey items pertaining to paid community employment had a large amount of missing data or data recorded as “don’t know.” Items that include states’ results for which 25% or more of their sample were missing data (or reported as “don’t know”) are indicated with an asterisk (*).

The quantity of missing data can be a result of several factors. We do not know whether the data are missing systematically or randomly; for example, are the data missing across the board for those in a specific waiver population in a given state? If so, the resulting data are not representative of the entire sample or population. We advise caution when examining data that are indicated as having high rates of “missing” or “don’t know” responses. Please note that the NCI average reflects the average of data that were reported to HSRI and may not be reflective of the service population across the country.

Has Paid Community Job

⁹New question in 2016-17

Community Inclusion, Participation and Leisure

People have support to participate in everyday community activities.

One Community Inclusion composite scale score was produced by adding four of the items: the number of times the person went shopping, on errands, for entertainment, and out to eat. For more information on the development of scales, see the Data Analysis section of Part II of the 2016-17 ACS National Report.

Health

People secure needed health services.

Important Note on Missing Data:

For several states, survey items in the Background Information section (including certain items related to Health) had a large amount of missing data or data recorded as “don’t know.” Items that include states’ results for which 25% or more of their sample were missing data (or reported as “don’t know”) are indicated with an asterisk (*).

The quantity of missing data can be a result of several factors. We do not know whether the data are missing systematically or randomly; for example, are the data missing across the board for those in a specific waiver population in a given state? If so, the resulting data are not representative of the entire sample or population. We advise caution when examining data that are indicated as having high rates of “missing” or “don’t know” responses.

Has Primary Care Doctor Or Practitioner

*State had a large number of "don't knows" and missing data (at least 25%)

Medications

Medications are managed effectively and appropriately.

Important Note on Missing Data:

For several states, survey items in the Background Information section (including certain items related to Medication) had a large amount of missing data or data recorded as “don’t know.” Items that include states’ results for which 25% or more of their sample were missing data (or reported as “don’t know”) are indicated with an asterisk (*).

The quantity of missing data can be a result of several factors. We do not know whether the data are missing systematically or randomly; for example, are the data missing across the board for those in a specific waiver population in a given state? If so, the resulting data are not representative of the entire sample or population. We advise caution when examining data that are indicated as having high rates of “missing” or “don’t know” responses.

Wellness

People are supported to maintain healthy habits.

Important Note on Missing Data:

For several states, survey items in the Background Information section (including certain items related to Wellness) had a large amount of missing data or data recorded as “don’t know.” Items that include states’ results for which 25% or more of their sample were missing data (or reported as “don’t know”) are indicated with an asterisk (*).

The quantity of missing data can be a result of several factors. We do not know whether the data are missing systematically or randomly; for example, are the data missing across the board for those in a specific waiver population in a given state? If so, the resulting data are not representative of the entire sample or population. We advise caution when examining data that are indicated as having high rates of “missing” or “don’t know” responses.

Exercises Or Does Physical Activity

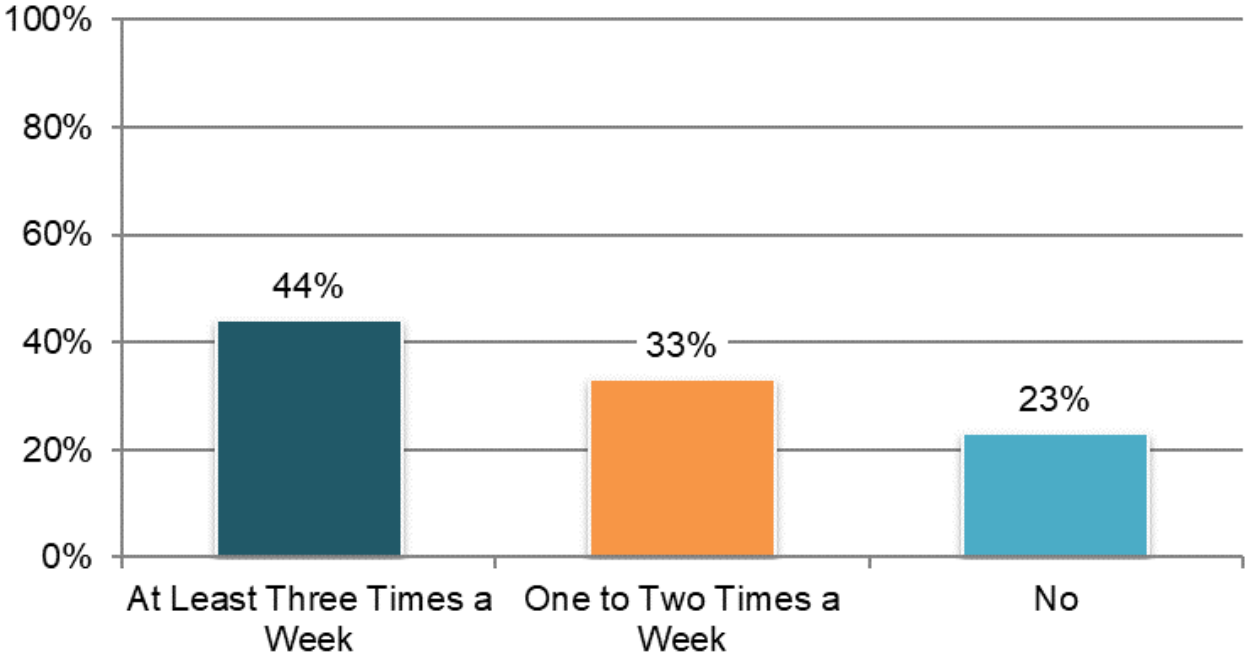

Table 118. Exercises or does physical activity at least 3 times per week ('yes, sometimes [1-2 times a week]' and 'yes, regularly [at least 3 times a week]' responses; proxy respondents were allowed for this question)
