Table 45. Receives paid time off (for example, paid vacation and/or sick time) at paid community job	34
Table 46. Four most common job industries (among those reported to have a job in the community)	34
Table 47. Does not have paid community job and would like a job in the community	35
Table 48. Reasons does not want a paid community job (among those who do not currently have and do not want a paid community job)	35
Table 49. Has community employment as a goal in their service plan	36
Table 50. Takes classes, training or does something to get a job or do better at current job	36
Table 51. Attends day program or sheltered workshop (a program or center where other people with disabilities spend their day)	36
Table 52. Volunteers	36
Self-Direction	37
Table 53. Using a self-directed supports option	40

Table 54. People who make decisions or have input in making decisions for how budget for services is used (among those using a self-directed supports option).....	40
Table 55. Hires or manages staff (among those using a self-directed supports option).....	40
Table 56. Can make changes to individual budget/services if needed (among those using a self-directed supports option)	40
Table 57. Has enough help deciding how to use their individual budget/services (among those using a self-directed supports option).....	41
Table 58. Gets information about how much money is left in budget/services (among those using a self-directed supports option).....	41
Table 59. Information about budget/services is easy to understand (among those using a self-directed supports option and who report they receive information about how much money is left in budget/services)	41
Table 60. Frequency with which the person gets information about budget/services (among those using a self-directed supports option)	41
Community Inclusion, Participation and Leisure	42
Table 61. Went out shopping at least once in the past month	46
Table 62. Went out on errands at least once in the past month.....	46
Table 63. Went out for entertainment at least once in the past month	46
Table 64. Went out to a restaurant or coffee shop at least once in the past month.....	46
Table 65. Went out to religious service or spiritual practice at least once in the past month.....	47
Table 66. Participates as a member in community group	47
Table 67. Went away on vacation in the past year.....	47
Table 68. Able to go out and do the things like to do in the community	47
Table 69. Gets to do things likes to do in the community as much as wants.....	47
Table 70. Has enough things likes to do when at home	48
Table 71. Gets help to learn new things	48
Relationships.....	49

Table 72. Has friends who are not staff or family members	53
Table 73. Has best friend (may be staff or family).....	53
Table 74. Wants help to meet or keep in contact with friends	53
Table 75. Has friends (may be staff or family) and can see their friends when they want	53
Table 76. Reasons cannot see friends if sometimes or often unable to.....	54
Table 77. Has other ways of talking, chatting, or communicating with friends when cannot see them	54
Table 78. Can see or communicate with their family when they want or chooses not to (among those who do not live in the family home)	54
Table 79. Often feels lonely	54
Table 80. Can go on a date or is married or living with partner	55
Satisfaction.....	56
Table 81. Likes home or where lives	60
Table 82. Reasons does not like home, continued (among those who do not like their home or where they live).....	60
Table 83. Wants to live somewhere else	60
Table 84. Likes paid community job (among those reported to have a paid community job from administrative records).....	60
Table 85. Wants to work somewhere else (among those reported to have a paid community job from administrative records).....	61
Table 86. Attends a day program or workshop and wants to go more, less, or the same amount of time.....	61
Table 87. Person wants to go out shopping more, less or the same amount as last month.....	61
Table 88. Person wants to go out for entertainment more, less or the same amount as last month	61
Table 89. Person wants to go out to a restaurant or coffee shop more, less or the same amount as last month	62
Table 90. Person wants to go out to a religious service or spiritual practice more, less or the same amount as last month	62
Table 91. Person wants to be a part of more community groups	62

Table 92. Services and Supports help person live a good life	62
Service Coordination.....	63
Table 93. Has met or spoken with case manager/service coordinator	68
Table 94. Case manager/service coordinator asks person what s/he wants	68
Table 95. Able to contact case manager/service coordinator when wants	68
Table 96. Staff come and leave when they are supposed to	68
Table 97. Took part in last service planning meeting, or had the opportunity but chose not to.....	68
Table 98. Understood what was talked about at last service planning meeting.....	68
Table 99. Last service planning meeting included people person wanted to be there.....	69
Table 100. Person was able to choose services they get as part of service plan	69
Table 101. Talked about learning new things at last service planning meeting.....	69
Table 102. Remembers what is in the service plan of those who report having or maybe having a service plan.....	69
Table 103. Service plan includes things that are important to person.....	69
Table 104. Knows who to ask if s/he wants to change something about services.....	70
Table 105. Of those who say they want to learn to perform ADLs more independently, the percentage who have a goal in the service plan to increase independence or improve function skill performance in ADLs	70
Table 106. Of those who say they want a paid job in the community (and do not currently have one), the percentage who have community employment as a goal in the service plan	70
Access.....	71
Table 107. Has a way to get places need to go.....	74
Table 108. Has a way to get places when wants to do something outside of home.....	74
Table 109. Staff have right training to meet person’s needs.....	74

Table 110. Additional services needed	75
Health.....	76
Table 111. Has a primary care doctor or primary care practitioner	80
Table 112. In poor health.....	80
Table 113. Had a complete physical exam in the past year.....	80
Table 114. Had a dental exam in the past year	80
Table 115. Had an eye exam or vision screening in the past year.....	81
Table 116. Had a hearing test in the past five years.....	81
Table 117. Had a Pap test in the past three years (women 21 and older)	81
Table 118. Had a mammogram test in the past two years (among women age 40 and over)	81
Table 119. Last colorectal cancer screening (among people age 50 and over).....	82
Table 120. Had a flu vaccine in the past year	82
Medication	83
Table 121. Takes at least one medication for mood, anxiety, psychotic disorder and/or behavioral challenge.....	86
Table 122. Takes medication for mood, anxiety, and/or psychotic disorders.....	86
Table 123. Number of medications taken for at least one of the following: mood disorders, anxiety, or psychotic disorders if taking at least one medication for this purpose.....	86
Table 124. Takes medication for behavior challenges.....	86
Table 125. Number of medications taken for behavior challenges if taking at least one for this purpose	87
Table 126. Has a behavior plan.....	87
Table 127. Has a behavior plan (among those who take medication for a behavior challenge).....	87
Wellness.....	88

Table 128. Exercises or does physical activity at least once per week for 10 minutes or more at a time	90
Table 129. Exercises or does physical activity at least once per week that makes the muscles in arms, legs, back, and/or chest work hard.....	90
Table 130. Body Mass Index (BMI) category.....	90
Table 131. Uses nicotine or tobacco products.....	90
Rights and Respect.....	91
Table 132. Others (who do not live in the home) let person know before entering home	97
Table 133. Has a key to the home.....	97
Table 134. Wants a key to the home (if does not have one).....	97
Table 135. Can lock bedroom if wants.....	97
Table 136. Others let person know before coming into person’s bedroom.....	97
Table 137. Has a place to be alone in the home.....	98
Table 138. Can be alone with friends or visitors at home	98
Table 139. There are rules about having friends or visitors in the home.....	98
Table 140. Can stay at home if others in the house go somewhere (if not living alone)	98
Table 141. Others read person’s mail or email without asking	98
Table 142. Can use phone and internet when wants	99
Table 143. Has a cell phone or smartphone	99
Table 144. Wants a cell phone or smartphone (if does not have one).....	99
Table 145. Reasons does not have a cell phone or smartphone (if does not have one but wants one).....	99
Table 146. Staff treat person with respect	100
Table 147. Has attended a self-advocacy group, meeting, conference or event or had the opportunity and chose not to	100

Table 148. Has voted in local, state, or federal election, or had the opportunity and chose not to.....	100
Safety	101
Table 149. There is at least one place where the person feels afraid or scared (in home, day program, work, walking in the community, in transport, and/or other place).....	103
Table 150. Has someone to talk to if ever feels afraid or scared.....	103

What is NCI?

The National Core Indicators (NCI) program is a voluntary effort by state developmental disability agencies to track their performance using a standardized set of consumer and family/guardian surveys with nationally validated measures. The effort is coordinated by the National Association of State Directors of Developmental Disabilities Services (NASDDDS) and the Human Services Research Institute (HSRI).

In 2018-19 a total of 46 states, the District of Columbia and 22 sub-state entities participated in NCI. Not all participating states do all surveys every year.

Where are the statistics in this report from?

This report includes findings from the National Core Indicators® 2018-19 In-Person Survey (IPS). The data shown are weighted NCI averages. These data are comprised of 22,009 valid surveys collected across 37 states: AL, AR, AZ, CO, CT, DE, FL, GA, HI, IN, KS, KY, ME, MI, MN, MO, NC, NE, NH, NJ, NV, NY, OH, OK, OR, PA, RI, SC, SD, TN, TX, UT, VA, VT, WA, WI, WY.

What is the NCI In-Person Survey?

The NCI In-Person Survey is completed with adults with IDD age 18 and older receiving at least one paid service (in addition to case management) from the state DD service system. The survey instrument includes a “Background Information Section”, which gathers data about the consumer from agency records, and an in-person survey that is conducted face-to-face with the person receiving services. The in-person survey is composed of two sections: Section I includes subjective questions that can only be answered by the person receiving services from the state. Section II includes objective, fact-based questions that can be answered by the person or, if needed, a proxy respondent who knows the person well.

What is included in this report?

This report includes this state’s In-Person Survey data compared to the weighted NCI Average. State outcomes that are statistically significantly higher or lower than the NCI Average are indicated with an arrow:

1. Outcomes where the state is significantly above the NCI average are denoted with an up arrow ▲;
2. Outcomes where the state is significantly below the NCI average are denoted with a down arrow ▼.

Significance is taken a .01 and account for *effect size*. For more information about significance testing and effect sized, please see the Methodology section of the National report: https://www.nationalcoreindicators.org/upload/core-indicators/NCI_IPS_--Overview_508_IPS_18_19.pdf

Presentation of Data

The charts in this document, grouped by subdomain, display the state results alongside the weighted average across states (NCI average). The charts are followed by accessible tables containing the same information.

Many questions in the IPS allow respondents to answer a question with “middle” response like “maybe”, “sometimes” or “in-between”. Data in this report are “collapsed” data. That means that two or more response options are grouped together if they are considered to reflect a positive outcome. The table titles explain which options were grouped. To see the breakout of responses for each option, please see Appendix C of the National In-Person Report.

The **NCI averages are “weighted”** to reflect the states’ relative population and sample sizes. We created the weights using the state’s number of valid surveys and its total survey-eligible population. This way, a state that provides services to a larger number of people but uses a sample similar in size to other states has a greater influence on the overall NCI average (that is, its contribution is *proportional to its service population*).

To find out more about the development of In-Person Survey, data analysis and state samples, check out the National In-Person Report: <https://bit.ly/34nvqXY>.

Demographics

This section presents descriptive information of individuals surveyed.

See all states Demographic data [here](#).

Important notes on data:

Several states had large amounts of missing data or data recorded as “don’t know.” Where 25% or more of a state’s sample had “don’t know” or missing responses, we used an asterisk (*) to indicate that state’s data should be interpreted with caution as it may not accurately represent the sample or service population.

An asterisk (*) denotes that data include at least 25% “don’t knows” and missing data
All NCI Averages are *weighted*

Table 1. Age

State v NCI	Mean	Min	Max	Standard Deviation	Median	N
NH	41.7	22	85	16	37	400
NCI	42.7	18	107	16	40	21,804

An asterisk (*) denotes that data include at least 25% "don't knows" and missing data
All NCI Averages are *weighted*

Choice and Decision-Making

People make choices about their lives and are actively engaged in planning their services and supports.

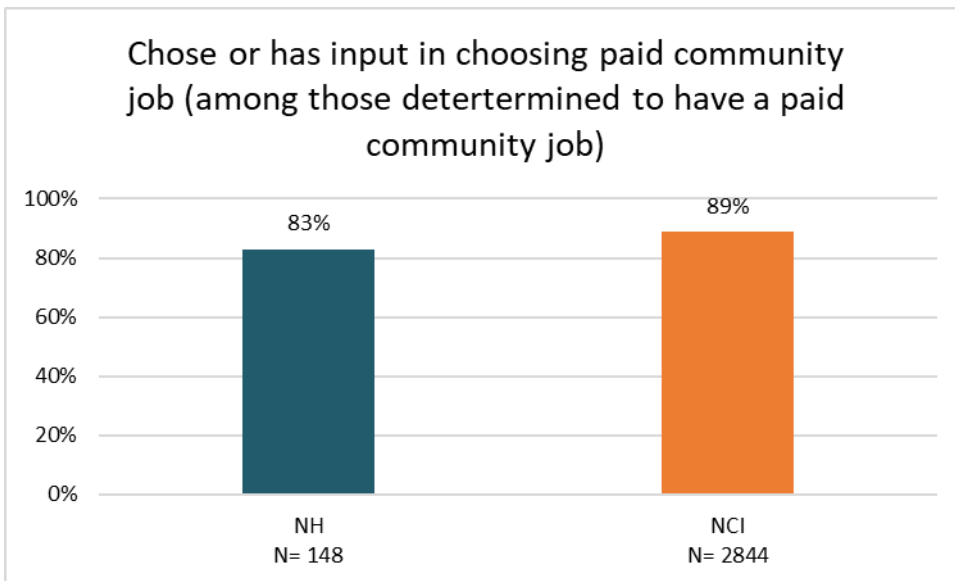

See all states' *Choice and Decision-Making* outcomes [here](#).

Important note on data

Data for all but one item ('Chose Case Manager/Service Coordinator') in this section are ***risk adjusted***. Risk (or "outcome") adjustment is a statistical process that helps "level the playing field" by controlling for differences in the individual characteristics of people who completed the IPS. This analysis helps account for the fact that states have different eligibility definitions for services and may have samples with different characteristics. The indicators are risk-adjusted using the following characteristics: age, level of intellectual disability, level of mobility, and whether any behavioral supports are needed to prevent self-injury, disruptive, or destructive behavior.

Data for NY, MN and WI are not included because items needed for risk adjustment were not available in records.

Data for all but one item ('Chose Case Manager/Service Coordinator') in this section are *risk adjusted*
Data for NY, MN and WI are not included because items needed for risk adjustment were not available in records

Work

People have support to find and maintain community integrated employment.

See all states' Work outcomes [here](#).

NCI reports on four types of paid community jobs:

1. Individual job without publicly funded supports—an individual job in which the person does not receive state or other funded supports;
2. Individual job with publicly funded supports— an individual job in which the person receives state or other funded supports;
3. Group-supported—a job that takes part in a community setting but is done with a group of individuals with disabilities (e.g., work crew). Group-supported jobs may or may not receive publicly funded supports; and
4. Community job in a business that primarily hires people with disabilities—a job where the employees with disabilities interact with the non-disabled population; this job is not in a traditional sheltered workshop and is NOT an enclave. This type was added to our definition of 'paid community job' in 2017-18.

Important note on data

Several states had large amounts of missing data or data recorded as “don’t know.” Where 25% or more of a state’s sample had “don’t know” or missing responses, we used an asterisk (*) to indicate that state’s data should be interpreted with caution as it may not accurately represent the sample or service population.

An asterisk (*) denotes that data include at least 25% “don’t knows” and missing data
All NCI Averages are weighted

Self-Direction

People participate in directing their own supports and services.

See all states' Self-Direction outcomes [here](#).

Important note on data

Several states had large amounts of missing data or data recorded as “don’t know.” Where 25% or more of a state’s sample had “don’t know” or missing responses, we used an asterisk (*) to indicate that state’s data should be interpreted with caution as it may not accurately represent the sample or service population. Additionally, many states' have very low rates of individuals who were surveyed and were reported to use a self-directed supports option. **Significance testing was not conducted on these items.**

The following states did not include individual’s using self-directed supports and their sample and therefore **are not represented** in these data:
AR, CO, DE, IN, ME, NV.

Data are based on those who are using a self-directed supports option

Health

People secure recommended health services.

See all states' *Health* outcomes [here](#).

Important note on data

Several states had large amounts of missing data or data recorded as “don’t know.” Where 25% or more of a state’s sample had “don’t know” or missing responses, we used an asterisk (*) to indicate that state’s data should be interpreted with caution as it may not accurately represent the sample or service population

An asterisk (*) denotes that data include at least 25% “don’t knows” and missing data
All NCI Averages are *weighted*

An asterisk (*) denotes that data include at least 25% “don’t knows” and missing data
