What is NCI?

The National Core Indicators (NCI) program is a voluntary effort by state developmental disability agencies to track their performance using a standardized set of consumer and family/guardian surveys with nationally validated measures. The effort is coordinated by the National Association of State Directors of Developmental Disabilities Services (NASDDDS) and the Human Services Research Institute (HSRI).

In 2018-19 a total of 46 states, the District of Columbia and 22 sub-state entities participated in NCI.

Where are the statistics in this report from?

This report includes findings from the National Core Indicators™ 2018-19 Family/Guardian Survey (FGS). The data shown are weighted NCI averages. These data are comprised of 2,664 valid surveys collected across nine states: AZ, GA, KY, LA, MD, NC, OH, PA and VA.

What is the NCI Family/Guardian Survey?

The NCI Family/Guardian Survey is used to gather data on family outcomes. It is mailed to families who have an adult family member who *does not live with* the respondent and receives at least one service other than case management from the state DD agency. The survey collects demographic information on both the individual receiving services (“family member”) as well as the person who fills out the survey (the ‘respondent’) and information on services and supports received. The survey is continually refined and tested to ensure it is valid and reliable.

Important note on responses: All data are reported by the respondent based on their understanding of their family member’s demographics, diagnoses and personal characteristics.

What is included in this report?

This report includes this state’s Family/Guardian Survey data compared to the NCI Average. State outcomes that are significantly higher or lower than the NCI Average are indicated with an arrow:

- Outcomes where the state is significantly above the NCI average are denoted with an up arrow ▲;
- Outcomes where the state is significantly below the NCI average are denoted with a down arrow ▼.

Significance is based on “Always” or “Yes” response.

The charts in this document, grouped by subdomain, display the state results alongside the average across states (NCI average). The charts are followed by accessible tables containing the same information.

Information and Planning Charts

Families and family members with disabilities have the information and support necessary to plan for their services and supports.

The following pages contain charts depicting the results. The same data is repeated in the tables that follow.

Did you discuss how to handle emergencies at your family member's last service planning meeting?

Does your family member have enough supports to work or volunteer in the community?

Do you feel prepared to handle the needs of your family member in an emergency such as a medical emergency or a natural disaster?
