Table 51. Does things in the community with the people they want.....	37
Table 52. Can be themselves when with others in groups, organizations, or communities the person takes part in (if person takes part in groups, organizations, or communities)	37
Table 53. Others include them as part of the group in groups, organizations, or communities the person takes part in (if person takes part in groups, organizations, or communities)	37
Table 54. Gets help to learn new things.....	38
Community Participation	41
Table 55. Went out shopping at least once in the past month	42
Table 56. Went out on errands at least once in the past month.....	42
Table 57. Went out for entertainment at least once in the past month	42

Table 58. Went out to a restaurant or coffee shop at least once in the past month.....	42
Table 59. Went out to religious service or spiritual practice at least once in the past month	43
Table 60. Takes part in groups, organizations or communities (in-person or virtually)	43
Table 61. The groups, organizations or communities takes part in include people without disabilities	43
Table 62. Community Inclusion Scale.....	43
Choice and Decision-Making	46
Table 63. Chose or had some input in choosing where they live if not living in the family home	47
Table 64. Chose or had some input in choosing their housemates if not living in the family home, or chose to live alone	47
Table 65. Decides or has help deciding their daily schedule.....	47
Table 66. Decides or has help deciding how to spend free time.....	47
Table 67. Has enough choice about what to do in free time	48
Table 68. Chose or had some help in choosing where they work (among those with a paid community job)	48
Table 69. Chose or had some input in choosing day program or workshop	48
Table 70. Has input in choosing their regular day activities (in addition to or instead of a paid community job and/or day program/workshop)	48
Table 71. Chooses or has help deciding what to buy or has set limits on what to buy with their spending money.....	49
Table 72. Chose staff or were aware they could request to change staff	49
Table 73. Can change their case manager/service coordinator if wants to.....	49
Table 74. Life Decisions Scale.....	49
Table 75. Everyday Choices Scale.....	50
Relationships	54
Table 76. Has friends who are not staff or family members	55
Table 77. Has best friend (may be staff or family)	55
Table 78. Wants more help to meet or keep in contact with friends.	55

Table 79. Has friends (may be staff or family) and can see their friends in person when they want	55
Table 80. Has other ways of talking chatting or communicating with friends when cannot see them in person	56
Table 81. Can see or communicate with their family when they want (among those who do not live in the family home).....	56
Table 82. Often feels lonely	56
Table 83. Can go on a date or is married or living with partner	56
Satisfaction.....	59
Table 84. Likes home or where lives.....	60
Table 85. Wants to live somewhere else	60
Table 86. Has enough things they like to do at home	60
Table 87. Likes paid community job (if working in a paid community job)	60
Table 88. Wants to go out shopping more, less or the same amount as last month	61
Table 89. Wants to go out for entertainment more, less or the same amount as last month.....	61
Table 90. Wants to go out to a restaurant or coffee shop more, less or the same amount as last month.....	61
Table 91. Wants to go out to a religious service or spiritual practice more, less or the same amount as last month	62
Table 92. Person wants to be a part of more community groups.....	62
Table 93. Satisfaction with community inclusion scale	62
Table 94. Likes how they usually spend time during the day	63
Table 95. Has used telehealth for healthcare services and like using it.....	63
Table 96. Has accessed services and support using video conference technology and like using it.....	63
Table 97. Have talked with their case manager using video conference technology and like using it	63
Self-Direction	68
Table 98. Using a self-directed supports option	69
Table 99. People who make decisions or have input in making decisions about the services that are self-directed.....	69
Table 100. Can make changes to individual budget/services if needed.....	69

Table 101. Has enough help deciding how to direct services.....	70
Table 102. Has the amount of control wanted with the services that are self-directed.....	70
Table 103. The services and supports they want to self-direct are always available	70
Table 104. Gets information about budget and services from financial management service (FMS).....	70
Table 105. Information from FMS is easy to understand	71
Table 106. Frequency with which the person gets information from FMS	71
Table 107. Needs help with these elements of self-direction.....	71
Service Coordination	75
Table 108. Has met or spoken with case manager/service coordinator	76
Table 109. Case manager/service coordinator knows what is important to person	76
Table 110. Able to contact case manager/service coordinator when wants	76
Table 111. Case manager/service coordinator has talked to them about technology that may help them in their everyday life	76
Table 112. Was at last service planning meeting, or had the opportunity to be but chose not to.....	77
Table 113. Knew what was being talked about at last service planning meeting	77
Table 114. Last service planning meeting included people respondent wanted to be there	77
Table 115. Person helped make service plan	77
Table 116. Case manager/service coordinator reviews their service plan with them throughout the year, when needed	78
Table 117. Service plan includes things that are important to person.....	78
Table 118. Knows who to ask if wants to change something about services.....	78
Table 119. Of those who say they want to learn to perform ADLs more independently, the percentage who have a related goal in the service plan.....	79
Table 120. Of those who say they want a paid job in the community (and do not currently have one), the percentage who have community employment as a goal in the service plan	79
Workforce.....	84
Table 121. Staff are respectful of person's culture	85

Table 122. Staff treat person with respect	85
Table 123. Person can talk or communicate with staff in their preferred language	85
Table 124. Staff do things the way person wants them done.....	85
Table 125. When in the community, staff support person in the way they want	86
Table 126. Staff come and leave when they are supposed to.....	86
Table 127. Person’s staff change too often.....	86
Table 128. Staff have the right training to meet person’s needs.....	86
Access.....	89
Table 129. Able to get places when wants to do something outside of home like going out to see friends, for entertainment, or to do something fun.....	90
Table 130. Has a way to get places they need to go (like work, appointments, etc.)	90
Table 131. Adequate Transportation Scale	90
Table 132. Has access to the internet	90
Table 133. Internet always works at home.....	91
Table 134. Frequency Uses Internet.....	91
Table 135. Uses technology in everyday life to help them do more things on their own.....	91
Table 136. Has enough help to use the technology and devices that help them in their everyday life (if uses technology that helps them do more things on their own).....	91
Table 137. Knows who to talk to if there are issues with the technology and devices that help them in their everyday life (if uses technology that helps them do more things on their own).....	92
Table 138. Has used telehealth to talk with a health professional.....	92
Table 139. Accessed services or supports using videoconference technology	92
Table 140. Has talked with their case manager/service coordinator using videoconference technology.....	93
Table 141. Has a cell phone or smartphone	93
Table 142. Wants a cell phone or smartphone (if does not have one).....	93

Table 143. Reasons does not have cell phone or smartphone	93
Table 144. Additional services needed	94
Table 145. Additional services needed (continued).....	94
Safety.....	100
Table 146. Feels afraid in their home, neighborhood, transport, workplace, day program/at other daily activity and/or other places	101
Table 147. Has someone to go to for help when they feel afraid	101
Health.....	103
Table 148. Has a primary care doctor or practitioner	104
Table 149. In poor health	104
Table 150. Had a complete physical exam in the past year	104
Table 151. Had a routine dental exam in the past year	104
Table 152. Had an eye exam/vision screening in the past year.....	105
Table 153. Had a hearing test in the past five years	105
Table 154. Had a Pap test in the past three years (among women 21 and older).....	105
Table 155. Had a mammogram test in the past two years (among women age 50 and over)	105
Table 156. Last colorectal cancer screening (among people age 45 to 75)	106
Table 157. Had a flu vaccine in the past 12 months.....	106
Table 158. Went to the emergency room for any reason to get care for themselves in the past 12 months.....	106
Table 159. Had an unexpected hospital admission due to dehydration, bowel obstruction, seizure, aspiration, or GERD, in the past year.....	107
Table 160. Fell and hurt themselves in the past six months.....	107
Medication.....	112
Table 161. Takes at least one medication for mood, anxiety, psychotic disorder, and/or behavioral challenges	113
Table 162. Takes medication for mood, anxiety, and/or psychotic disorders	113

Table 163. Number of medications taken for at least one of the following: mood disorders, anxiety, or psychotic disorders	113
Table 164. Takes medication for behavior challenges	113
Table 165. Number of medications taken for behavior challenges if taking at least one for this purpose.....	114
Table 166. Has behavior plan	114
Table 167. Has behavior plan (among those who take medication for a behavior challenge)	114
Wellness	117
Table 168. Uses tobacco products.....	118
Table 169. Body Mass Index (BMI) category	118
Table 170. Exercises or does physical activity at least once per week for 10 minutes or more at a time.....	118
Table 171. Exercises or does physical activity at least once per week that makes the muscles in arms, legs, back, and/or chest work hard.....	119
Rights and Respect	121
Table 172. Has attended a self-advocacy group, meeting, conference or event or had the opportunity and chose not to	122
Table 173. Has ever voted in local, state, or federal election, or had the opportunity and chose not to	122
Table 174. Has a place to be alone in the home	122
Table 175. Has a key to the home	122
Table 176. Wants a key to the home (if does not have one)	123
Table 177. Can lock bedroom if wants	123
Table 178. Others (who do not live in the home) let person know before entering home.....	123
Table 179. Others let person know before coming into person's bedroom	123
Table 180. Others read person's mail or email without asking.....	124
Table 181. There are no rules for using phone or internet.....	124
Table 182. There are rules about having friends or visitors in the home	124
Table 183. Can stay at home if others in the house go somewhere	124

Table 184. Respect for Personal Space Scale.....	125
--	-----

What is National Core Indicators® – Intellectual and Developmental Disabilities (NCI-IDD)?

The National Core Indicators® – Intellectual and Developmental Disabilities (NCI-IDD) program is a voluntary effort by state developmental disability agencies to track their performance using a standardized set of consumer and family/guardian surveys with nationally validated measures. The effort is coordinated by the National Association of State Directors of Developmental Disabilities Services (NASDDDS) and the Human Services Research Institute (HSRI).

Where are the statistics in this report from?

This report includes findings from the National Core Indicators® 2021-22 In-Person Survey (IPS). The data shown are weighted NCI-IDD averages. These data are comprised of valid surveys collected across 27 states: AR, CO, CT, DE, FL, GA, IL, IN, KS, KY, MA, MI, MN, MO, NE, NV, NJ, NY, NC, OH, OK, OR, PA, SC, UT, VA, WI.

What is the NCI-IDD In-Person Survey?

The NCI-IDD In-Person Survey is completed with adults with IDD age 18 and older receiving at least one paid service (in addition to case management) from the state DD service system. The survey instrument includes a “Background Information Section”, which gathers data about the consumer from agency records, and an In-Person Survey that is conducted face-to-face with the person receiving services, either in person or via videoconference. The In-Person Survey is composed of two sections: Section I includes subjective questions that can only be answered by the person receiving services from the state. Section II includes objective, fact-based questions that can be answered by the person or, if needed, a proxy respondent who knows the person well.

What is included in this report?

This report includes this state’s In-Person Survey data compared to the weighted NCI-IDD Average. State outcomes that are statistically significantly higher or lower than the NCI-IDD Average are indicated with an arrow:

1. Outcomes where the state is significantly above the NCI-IDD average are denoted with an up arrow ▲;
2. Outcomes where the state is significantly below the NCI-IDD average are denoted with a down arrow ▼.

Significance is taken a .01 and account for *effect size*. For more information about significance testing and effect sized, please see [the Methodology section of the National report](#).

Presentation of Data

The charts in this document, grouped by subdomain, display the state results alongside the weighted average across states (NCI-IDD average). The charts are followed by accessible tables containing the same information.

Many questions in the IPS allow respondents to answer a question with “middle” response like “maybe”, “sometimes” or “in-between”. The data in this report are “collapsed” data. That means that two or more response options are grouped together if they are considered to reflect a positive outcome. The table titles explain which options were grouped. To see the breakout of responses for each option, please see [Appendix C of the National In-Person Report](#).

The NCI-IDD averages are “weighted” to reflect the states’ relative population and sample sizes. We created the weights using the state’s number of valid surveys and its total survey-eligible population. This way, a state that provides services to a larger number of people but uses a sample similar in size to other states has a greater influence on the overall NCI-IDD average (that is, its contribution is *proportional to its service population*).

To find out more about the development of In-Person Survey, data analysis and state samples, check out the [National In-Person Survey Report](#).

Demographics

This section presents descriptive information of individuals surveyed.

Important notes on data:

Several states had large amounts of missing data or data recorded as “don’t know.” Where 25% or more of a state’s sample had “don’t know” or missing responses, we used an asterisk (*) to indicate that state’s data should be interpreted with caution as it may not accurately represent the sample or service population.

Table 1. Age

State v NCI	Mean	Min	Max	Standard Deviation	Median	N
IL	44.4	19	92	15.2	42.0	398
NCI-IDD	42	18	100	16	39	13,416

⁵ At the time of survey implementation vaccine boosters were not in use

Employment

Value statement: People have competitive paid jobs in community-based businesses. People's jobs reflect varied preferences for employment.

NCI-IDD reports on four types of paid community jobs:

1. Individual job without publicly funded supports—an individual job in which the person does not receive state or other funded supports;
2. Individual job with publicly funded supports— an individual job in which the person receives state or other funded supports;
3. Group-supported—a job that takes part in a community setting but is done with a group of individuals with disabilities (e.g., work crew). Group-supported jobs may or may not receive publicly funded supports; and
4. Community job in a business that primarily hires people with disabilities—a job where the employees with disabilities interact with the non-disabled population; this job is not in a traditional sheltered workshop and is NOT an enclave.

Important note on data

Several states had large amounts of missing data or data recorded as “don’t know.” Where 25% or more of a state’s sample had “don’t know” or missing responses, we used an asterisk (*) to indicate that state’s data should be interpreted with caution as it may not accurately represent the sample or service population.

Please note: The following states are not included in some of the tables due to low N (<20), but their responses are included in the NCI Average: AL, HI, KY, MN and WI. State data with at least 25% “don’t knows” and missing data are denoted with an asterisk ()*

WI captured employment information differently from other states; their data are not comparable to other states and are therefore denoted with a sign (≠).

Table 40. Has a paid community job individual group and or in a business that primarily hires people with disabilities (Also known as “competitive employment”)

Information may have been obtained through state records

NCI-IDD	63%	7,059

Likes home or where he/she lives

Wants to live somewhere else

Has enough things they like to do at home

Likes paid community job

Person wants to go out for shopping more, less or the same amount as last month

Person wants to go out for entertainment more, less or the same amount as last month

Person wants to go out to a restaurant or coffee shop more, less or the same amount as last month

Person wants to go out to a religious service or spiritual practice more, less or the same amount as last month

Person wants to be a part of more community groups

Satisfaction with community inclusion

Likes how they usually spend time during the day

Has used telehealth for healthcare services and liked using it

Has accessed services and support using video conference technology and like using it

Have talked with their case manager using video conference technology and liked using it

Self-Direction

Value statement: People who use a self-directed supports option have the information and support needed to actively participate in directing their own supports and services.

Important note on data

Several states had large amounts of missing data or data recorded as “don’t know.” Where 25% or more of a state’s sample had “don’t know” or missing responses, we used an asterisk (*) to indicate that state’s data should be interpreted with caution as it may not accurately represent the sample or service population. Additionally, many states have very low rates of individuals who were surveyed and were reported to use a self-directed supports option. **Significance testing was not conducted on these items.**

PLEASE NOTE: The data in this section may reflect the perspective of the person receiving services or that of friends/family who participate in decisions about the self-directed supports option.

Table 98. Using a self-directed supports option

Table 107. Needs help with these elements of self-direction

State v NCI	Help planning out service needs and setting a schedule for staff	Help getting staff paid	Help finding or keeping the staff they want	Help training staff	Help managing benefits for staff	Help understanding information gets from the FMS	More information about what services and supports can get	Other	Don't know, no response, unclear response	N
IL	2%	4%	4%	2%	0%	2%	20%	24%	54%	50
NCI-IDD	14%	15%	30%	14%	10%	22%	45%	25%	16%	907

¹² Please note: OR replaced “FMS” with “CME”

Using a self directed supports option

People who make decisions or have input in making decisions about the services that are self directed

Can make changes to individual budget/services if needed

Has enough help deciding how to direct services

The services and supports they want to self-direct are always available

Gets information about budget and services from financial management service (FMS)

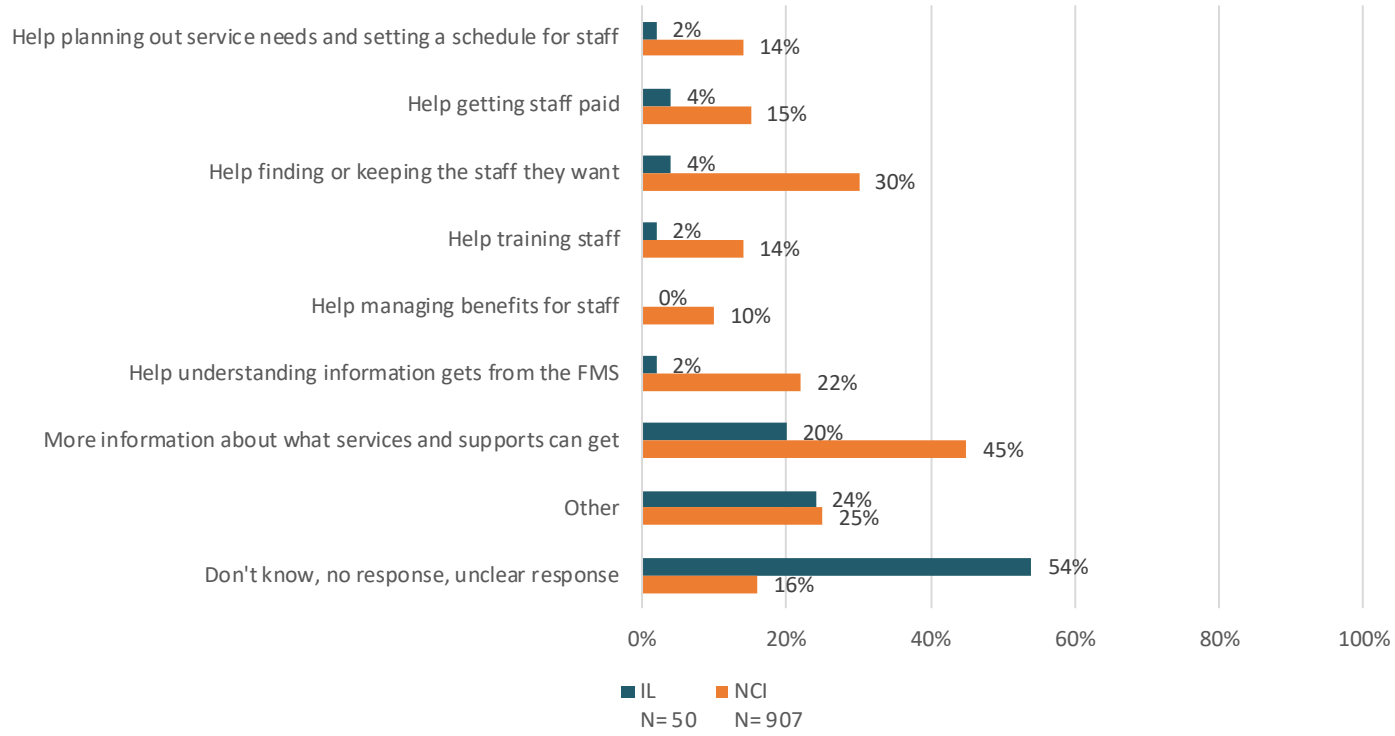

Information from FMS is easy to understand

Frequency with which the person gets information from FMS

Needs help with these elements of self direction

Service Coordination

Value statement: Case managers/service coordinators are accessible and responsive to people. Case managers/service coordinators are knowledgeable about people's needs and the services/supports available to address those needs. Service plans reflect people's goals and needs and are modified as changes occur. People actively engage in the service planning process.

Table 108. Has met or spoken with case manager/service coordinator

Table 119. Of those who say they want to learn to perform ADLs more independently, the percentage who have a related goal in the service plan¹³

State v NCI	Average	N
IL	72%	32
NCI-IDD	73%	1,302

Table 120. Of those who say they want a paid job in the community (and do not currently have one), the percentage who have community employment as a goal in the service plan¹⁴

State v NCI	Average	N
IL	39%	66
NCI-IDD	35%	2,064

¹³ Please note: “ADL” refers to Activities of Daily Living. A related goal in the service plan refers to goals to increase independence or improve function skill performance in ADL. This analysis combines two questions that come from two different sources 1. Whether there is a goal in service plan to increase independence or improve functional skill performance in ADLs obtained through administrative records; and, 2. Whether the person wants to learn to do more ADLs on their own is asked during the face-to-face meeting with the person receiving services and can only be answered by that person.

¹⁴ Please note: This analysis combines two questions that come from two different sources 1. Whether community employment is a goal in service plan; and 2. Whether the person wants a job is asked during the face-to-face meeting with the person receiving services and can only be answered by that person

Has met or spoken with case manager/service coordinator

Case manager/service coordinator knows what is important to person

Able to contact case manager/service coordinator when wants

Case manager/service coordinator has talked to them about technology that may help them in their everyday life

Was at last service planning meeting, or had the opportunity to be but chose not to

Knew what was being talked about at last service planning meeting

Last service planning meeting included people respondent wanted to be there

Person helped make service plan

Case manager/service coordinator reviews their service plan with them throughout the year, when needed

Service plan includes things that are important to person

Knows who to ask if wants to change something about services

Of those who say they want to learn to perform ADLs more independently, the percentage who have a related goal in the service plan

Of those who say they want a paid job in the community (and do not currently have one), the percentage who have community employment as a goal in the service plan

Workforce

Value statement: There is stable and sufficient direct support workforce to meet demand. People are supported by staff who demonstrate respect for what is important to the person in their day-to-day life. Staff have the right skills to support people.

Table 121. Staff are respectful of person's culture

State v NCI	Average	N

NCI-IDD	12%	8%	7%	8%	14%	49%	2%

Able to get places when wants to do something outside of home like going out to see friends, for entertainment, or to do something fun

Has a way to get places she needs to go (like work, appointments, etc.)

Adequate Transportation Scale

Has access to the internet

Internet always works at home

Frequency Uses Internet

Uses technology in everyday life to help them do more things on their own

Has enough help to use the technology and devices that help them in their everyday life (if uses technology that helps them do more things on their own)

Knows who to talk to if there are issues with the technology and devices that help them in their everyday life (if uses technology that helps them do more things on their own)

Has used telehealth to talk with a health professional.

Accessed services or supports using videoconference technology

Has talked with their case manager/service coordinator using videoconference technology

Has a cell phone or smartphone

Wants a cell phone or smartphone (if does not have one)

Reasons does not have cell phone or smartphone

Additional services needed

Additional services needed (continued)

Safety

Value Statement: People feel safe at home and outside of the home. People know whom to talk to if they don't feel safe.

Table 146. Feels afraid in their home, neighborhood, transport, workplace, day program/at other daily activity and/or other places

State v NCI	Average	N
IL	19%	255
NCI-IDD	20%	7,851

Table 147. Has someone to go to for help when they feel afraid

State v NCI	Average	N
IL	94%	267
NCI-IDD	94%	7,961

There is at least one place where the person feels afraid or scared in home day program work walking in the community in transport or other place

Has someone to go to for help if they ever feel scared

Health

Value Statement: People have access to and get recommended health services at the recommended frequencies.

Important note on data

Several states had large amounts of missing data or data recorded as “don’t know.” Where 25% or more of a state’s sample had “don’t know” or missing responses, we used an asterisk (*) to indicate that state’s data should be interpreted with caution as it may not accurately represent the sample or service population
