Table 25. Support needed to manage self-injurious behavior.....	29
Table 26. Support needed to manage disruptive behavior	30
Table 27. Support needed to manage destructive behavior.....	31
Table 28. Level of guardianship	32
Table 29. Guardian’s relationship to person	33

Table 30. Funding source	34
Table 31. Person receives Medicare.....	35
Table 32. Amount of daily support received at home	36
Table 33. Has remote supports*	37
Table 34. Has ever been diagnosed or presumed diagnosed with COVID-19.....	38
Table 35. Has ever required in-patient hospitalization due to COVID-19 (of those who had COVID19).....	39
Table 36. Has gotten the COVID-19 vaccine	40

Where do these data come from?

Most items in this section are drawn from administrative sources. Select items may have been collected during the face-to-face survey; those items are noted in the tables.

Read more about NCI-IDD domains and sub-domains in the Overview chapter of this report.

What is weighting and why do we do it?

The NCI-IDD averages are “weighted” to reflect the states’ relative population and sample sizes. We created the weights using the state’s number of valid surveys and its total survey-eligible population. This way, a state that provides services to a larger number of people but uses a sample similar in size to other states has a greater influence on the overall NCI-IDD average (that is, its contribution is *proportional to its service population*). You can read more about this in the Methodology section of the Overview chapter.

The number of respondents (N) for each question *is not* weighted.

Data Caution

Several states had large amounts of missing data or data recorded as “don’t know.” Where 25% or more of a state’s sample had “don’t know” or missing responses, we used an asterisk (*) to indicate that state’s data should be interpreted with caution as it may not accurately represent the sample or service population.

Tables show states listed in alphabetical order and are not tested for significance.

Important Note on Changes to the 2022-23 Survey Tool

NCI-IDD operates on a six-year revisions cycle to regularly ensure the current set of indicators meet the needs of state systems and reflect current needs in the field. Survey changes are guided by state managers, people with disabilities, and other experts in the field. The 2021-22 survey tool reflected changes based on this guidance and additional survey testing. Please note, any changes to the survey tool may affect comparison to previous years’ data, therefore any cross-year comparison should be made with caution.

Table 1. Age

State (names abbreviated)	Mean Age (Years)	Min	Max	Standard Deviation	Median	N
AL	45.1	18	90	15.4	44	472
