Rights and Respect	78
Table 164. Has attended a self-advocacy group, meeting, conference or event or had the opportunity and chose not to.....	79
Table 165. Has ever voted in local, state, or federal election, or had the opportunity and chose not to	79
Table 166. Has a place to be alone in the home	79
Table 167. Has a key to the home.....	79
Table 168. Wants a key to the home (if does not have one)	80
Table 169. Can lock bedroom if wants	80
Table 170. Others (who do not live in the home) let person know before entering home	80
Table 171. Others let person know before coming into person's bedroom	80
Table 172. Others read person's mail or email without asking	81
Table 173. There are no rules for using phone or internet.....	81
Table 174. There are rules about having friends or visitors in the home	81
Table 175. Can stay at home if others in the house go somewhere	81
Table 176. Respect for Personal Space Scale	82

The NCI-IDD average is weighted

What is National Core Indicators® – Intellectual and Developmental Disabilities (NCI-IDD)?

The National Core Indicators® – Intellectual and Developmental Disabilities (NCI-IDD) program is a voluntary effort by state developmental disability agencies to track their performance using a standardized set of consumer and family/guardian surveys with nationally validated measures. The effort is coordinated by the National Association of State Directors of Developmental Disabilities Services (NASDDDS) and the Human Services Research Institute (HSRI).

Where are the statistics in this report from?

This report includes findings from the National Core Indicators® 2024-25 In-Person Survey (IPS). The data shown are weighted NCI-IDD averages. These data are comprised of valid surveys collected across 39 states: AL, AZ, AR, CA, CO, CT, DE, DC, GA, HI, IL, IN, KS, KY, LA, MD, MI, MN, MO, MT, NE, NV, NH, NJ, NY, NC, ND, OH, OK, OR, PA, SC, SD, TX, UT, VA, WA, WI, WY.

What is the NCI-IDD In-Person Survey?

The NCI-IDD In-Person Survey is completed with adults with IDD age 18 and older receiving at least one paid service (in addition to case management) from the state DD service system. The survey instrument includes a “Background Information Section”, which gathers data about the consumer from agency records, and an In-Person Survey that is conducted face-to-face with the person receiving services, either in person or via videoconference. The In-Person Survey is composed of two sections: Section I includes subjective questions that can only be answered by the person receiving services from the state. Section II includes objective, fact-based questions that can be answered by the person or, if needed, a proxy respondent who knows the person well.

What is included in this report?

This report includes this state’s In-Person Survey data compared to the weighted NCI-IDD Average. State outcomes that are statistically significantly higher or lower than the NCI-IDD Average are indicated with an arrow:

1. Outcomes where the state is significantly above the NCI-IDD average are denoted with an up arrow ↑;
2. Outcomes where the state is significantly below the NCI-IDD average are denoted with a down arrow ↓.

Significance was set at $\alpha = .01$, with effect size considered. For more information about significance testing and effect size, please see the Methodology section of the National report.

The NCI-IDD average is weighted

Presentation of Data

Many questions in the IPS allow respondents to answer a question with “middle” response like “maybe”, “sometimes” or “in-between”. The data in this report are “collapsed” data. That means that two or more response options are grouped together if they are considered to reflect a positive outcome. The table titles explain which options were grouped. To see the breakout of responses for each option, please see Appendix C of the National In-Person Report.

The NCI-IDD averages are “weighted” to reflect the states’ relative population and sample sizes. We created the weights using the state’s number of valid surveys and its total survey-eligible population. This way, a state that provides services to a larger number of people but uses a sample similar in size to other states has a greater influence on the overall NCI-IDD average (that is, its contribution is *proportional to its service population*). To find out more about the development of In-Person Survey, data analysis and state samples, check out the National In-Person Survey Report.

The NCI-IDD average is weighted

Demographics

This section presents descriptive information of individuals surveyed.

Important note on data Several states had large amounts of missing data or data recorded as “don’t know.” Where 25% or more of a state’s sample had “don’t know” or missing responses, we used an asterisk (*) to indicate that state’s data should be interpreted with caution as it may not accurately represent the sample or service population.

The NCI-IDD average is weighted

In-Person Survey 2024-25 State Report

Table 1. Age

State	Age (Mean)	Minimum	Maximum	Standard Deviation	Age (Median)	N
DE	42.4	19	85	15.5	39	405
NCI-IDD	40.6	18	90	15.8	37	30790

Table 2. Age Group

State	18-22	23-34	35-54	55-74	75 and Older	Unknown	N
DE	4%	35%	38%	21%	3%	0%	405
NCI-IDD	10%	35%	33%	20%	3%	0%	30888

Table 3. Sex

Refers to individual's sex as assigned at birth.

State	Male	Female	Unknown	N
DE	66%	34%	0%	405
NCI-IDD	60%	40%	0%	30838

Table 4. Marital Status

Information may have been obtained through state records.

State	Single, never married	Married	Single, married in the past	Unknown	N
DE	97%	1%	2%	0%	396
NCI-IDD	94%	1%	2%	3%	30545

The NCI-IDD average is weighted

Table 5. Is This Person a Parent?

Categories are not mutually exclusive; therefore, N is not shown.

State	No, does not have a child	Yes, parent of a child or children under 18	Yes, parent of a child or children over 18	Yes, parent of a child or children, unknown age(s)	Unknown
DE	n/a	n/a	n/a	n/a	n/a
NCI-IDD	97%	1%	2%	0%	10%

Data display is suppressed (i.e. shown as n/a) with low counts of responses (n<20). These responses are retained in NCI-IDD average calculations.

Table 6. Race and Ethnicity

Categories are not mutually exclusive; therefore, N is not shown; “Don’t Know” responses are included in the denominator, which is different from past years. In previous years, this variable was mutually exclusive.

State	American Indian or Alaska Native	Asian	Black or African American	Pacific Islander	White	Hispanic or Latino	Other	Don’t Know
DE	0%	2%	29%	0%	66%	3%	0%	0%
NCI-IDD	1%	4%	17%	0%	65%	14%	2%	5%

Table 7. Residential Designation

Information based on residential designation defined by the USDA: <https://www.ers.usda.gov/data-products/rural-urban-commuting-area-codes.aspx>

State	Metropolitan	Micropolitan	Rural	Small town	N
DE	81%	15%	0%	4%	405

Employment

Value statement: People have competitive paid jobs in community-based businesses. People's jobs reflect varied preferences for employment.

NCI-IDD reports on four types of paid community jobs: 1. Individual job without publicly funded supports—an individual job in which the person does not receive state or other funded supports; 2. Individual job with publicly funded supports— an individual job in which the person receives state or other funded supports; 3. Group-supported—a job that takes part in a community setting but is done with a group of individuals with disabilities (e.g., work crew). Group-supported jobs may or may not receive publicly funded supports; and 4. Community job in a business that primarily hires people with disabilities—a job where the employees with disabilities interact with the non-disabled population; this job is not in a traditional sheltered workshop and is NOT an enclave.

Important note on data Several states had large amounts of missing data or data recorded as “don’t know.” Where 25% or more of a state’s sample had “don’t know” or missing responses, we used an asterisk (*) to indicate that state’s data should be interpreted with caution as it may not accurately represent the sample or service population.

The NCI-IDD average is weighted

Table 38. Has a community job; individual, group and/or in a business that primarily hires people with disabilities

State	No	Yes	N
DE	n/a	n/a	n/a

Service Coordination

Value statement: Case managers/service coordinators are accessible and responsive to people. Case managers/service coordinators are knowledgeable about people's needs and the services/supports available to address those needs. Service plans reflect people's goals and needs and are modified as changes occur. People actively engage in the service planning process.
